

Burnet Saxifrage

Burnet Saxifrage (*Pimpinella saxifrage*) is a tall grassland perennial, reaching 30-100cm tall. It has clusters of white or pink flowers each 2mm in diameter, all branching from the same point at the top of a stem. Flowering occurs from July to September.

Burnet Saxifrage thrives on chalk and limestone soils and occasionally on clay. Commonly found on roadsides, hedge banks and woodland edges.

Seed requires a period of chilling to break dormancy.

Sowing Time: Autumn
