

## Herb Robert

**Herb Robert (*Geranium robertianum*) has star shaped flower heads measuring 1.5 to 2cm across. It has five petals, usually pink with paler veins and are round tipped. It has five sepals with broadly membranous margins being glossy and erect. Flowers grow in pairs, blooming from late spring into early autumn.**

**This plant is able to tolerate shade and Herb Robert can be found on a variety of habitats including woodland, hedgerows and coastal areas.**

**Sowing Time: Spring/Autumn**
